

You could check over your vehicle yourself, have a friend down the pub or have one of our factory trained Technical Engineers do it for you free of charge.

**With the time between services getting longer it makes sense to raise your vehicle six foot off the ground every so often to check the brake pads, discs, hoses, tyres, steering and suspension, driveshaft and exhaust.**

## **Consider the implications**

Badly maintained vehicles can increase fuel consumption by over 30%.

Normal wear and tear can render a vehicle dangerous and illegal. As a result you could be subject to substantial fines and disqualification or even worse if you or a driver is involved in an accident.

If you employ people to drive your vehicles the introduction of corporate liability places greater emphasis on ensuring their safety.

Don't just wait until your next service, stay ahead of the game. We offer a free 37 item check on your vehicle to catch any problems before they catch you.

All we ask is that you join our Technical Engineer whilst he inspects your vehicle.

## **Free Visual Health Check with this leaflet.**

**Ask or call your service advisor for more information.**
